Education

California State University, Northridge
Master of Arts, *Psychological Science*

August 2021- Present

Arizona State University, Tempe AZ
Bachelor of Science, *Psychology*
Bachelor of Science, *Medical Studies*

August 2015 – July 2020

Research Interests

- Mental Resilience
- Post-traumatic stress disorder
- Augmented & Virtual reality interventions
- Sensory and perception manipulation
- Veterans & associated military personnel

Honors & Awards

- Dean's List, Arizona State University May 2020
- Dean's List, Arizona State University December 2019
- Arizona Twin Project Research Assistant of the Month April 2019
- Dean's List, Arizona State University May 2018

Research Experience

Antiviral Research Center Research Associate, *University of California San Diego Health*

Data Associate

September 2020-August 2021

- Maintain and update chart records of visit and medical information from participants for covid-19 vaccine trials
- Resolve clinical data queries by working with practitioners, nurses, and clinical research coordinators related to medical history, medications, adverse events, and hospitalization/medical records of participants during vaccine trial
- Monitor copies of physical records of participants and compare for accuracy and completion against electronic data files in electronic database
- Ensure accuracy of reporting to match guidelines in protocol to prevent future clinical queries
- Suggest changes and edits for case report forms to allow easier reporting and accuracy of essential information from patient visits and unscheduled contacts
- Handle confidential participant information by managing tracking and flow of physical charts between multiple sites
- Manage electronic database for two separate clinical research covid-9 vaccine trials

Arizona Twin Project Research Assistant, *Arizona State University*

Research Assistant

September 2017- July 2020

- Safely and professionally handle biohazard from patients for research purposes

- Uphold strict confidentiality laws regarding privacy for addresses, DNA, and anatomical details
- Prepare saliva samples for shipping and packing to off-site location for cortisol analysis
- Memorize and implement multiple extensive procedures for personal safety and data accuracy
- Obtaining knowledge in hypothalamic-pituitary-adrenal axis and genetics effects on stress and chronic pain
- Independently developed food diary coding system that has been implemented in the lab
- Assist graduate student with overseeing food diary progress and reliability checks

Positive Aging Research & Development Research Associate, *California State University Northridge*

Research Associate

August 2021- Current

- The AWARE Project: Arming Wearable Augmented Reality Equipment to Strengthen Psychological Reserves and Resilience
- Recruit and mentor research assistants of minority background for projects ongoing in research lab
- Collaborate with principal investigator on AWARE project, providing insight on organization and project management
- Draft lab protocols, contracts, and organizational charts for research assistants
- Serve on multidepartment committee fostering collaboration for desired outcomes of AWARE Project
